

ENEZA SERIES

Excellent and modern design,high for the highest architectural requirements city squares,gardens,home and commercial yards,shopping malls,fashion and walking streets,hotels,green areas,walkways,business areas,etc.

Description
Features:

Rating:IP65

Pole: Hot dip galvanized pole with corrosion-resistant polyester powder coat finish,high performance of rigidity and durability .

Housing:Die casting aluminum housing features optimal rigidity,high durability and corrosion proof.

Support: Three stainless steel support with the top part connected with plastic support of the reflector and the bottom part rigidly inserted in the base hole and screwed rigidly with high stability.

Reflecting plate:Studded sphere stainless steel reflector fixed in the middle of the aluminum reflector,providing optimal rigidity and durability,wide range of illumination with minimum weight,self-cleaning and corrosion resistant.

Reflector:High purity anodised symmetric aluminum reflector offers high light efficiency.

Application:
Business district,square,walking street, park,residence community etc.

Installation:
Traditional flange plate(250x250mm) available in the bottom of the pole with 4 standard bolt holes in and the hole-distance 200mm between each for fixing firmly.
