

## PROTEZZIO SERIES

Explosion proof light fitting

Model.: LT-YGWH183B

Description  
Features:

Rating:IP65

Construction: Die-casting aluminum neck externally with chain linked to the housing with bolt fixed rigidly,high performance of rigidity and corrosion resistance. Easily unscrew,not take off, the stainless steel screws for quick access to the internal for relamping and safe operation.

Glass:Tempered glass with wire guard for safe and reliability.

Reflector:Professionally designed reflector,provides accurate light distribution and higher light efficiency.

Application: High request on corrosion proof and explosion proof area

Installation

The die-casting aluminum neck could be connected with G3/4" upright stanchion or curved pipe for suspending or upright stanchion mounting.A screw attached on the connecting part of neck provides solid tightening on pipe for reliable and safe connection.

Model	Dimension	Power	Light source	Lamp Type
