

MODENA SERIES

Modern and robust design, city squares, gardens, home and commercial yards, shopping malls, fashion and walking streets, hotels, green areas, walkways, business areas, etc.

Description
Features:

Rating: IP65

Pole: Hot dip galvanized pole with corrosion-resistant polyester powder coat finish, high performance of rigidity and durability.

Housing: Die-casting aluminum housing precisely designed for optimum durability. Top cover: Aluminum sheet shaped top cover with white polyester powder coated on inner surface for superior reflecting. Easy and quick access for relamping just by toolless loosening the knob on the top part of the cover.

Grille: Built-in grille, white polyester powder coat finish, precisely designed for glare free and comfortable vision.

Support: Four pieces die-casting aluminum support firmly fixed, providing rigid support to the top cover and nice decoration.

Lens: Polycarbonate (PC) lens with UV proof and shock proof.

Application: Business district, square, walking street, park, residence community etc.

Installation:
Traditional flange plate (250x250mm) available in the bottom of the pole with 4 standard bolt holes in and the hole-distance 200mm between each for fixing firmly.
